**Subject:** FW: Electric Bus Chargers Final Stamped Drawings

Good morning Linda,

As we've been discussing, the design necessary for constructing the two BEB chargers is attached. We have the chargers in our possession, so when this work is complete – commissioning on site can be scheduled.

The high-level estimate for this work is \$200k, and funding is in place. I have discussed this with Sandy Infantino and Lisa Rivers and (assuming WRTD is able to procure the construction) they are on board with approving through the AFE process.

Do you have a boiler plate procurement document that you intend to use? If so, can you send it to me in word format? There is some language that we'd like to insert so that the full scope of work is covered.

Chris and I will coordinate & oversee the construction once a contractor is on board, and code inspections will be done by CTDOT's in-house team.

Let me know if you'd like to meet to discuss in more detail.

Thanks,

**PETE MONTANA**

Pete,

See attached PE stamped drawings for the Electric Bus Chargers. Please let me know if you have any questions or comments. We did add product spec notes to the drawing set.

Thanks.
